Any Standard — Any Process
SCM: the smart way to get compliant!

infopulse

Creating Value, Delivering Excellence

Infopulse Standards Compliance Manager (Infopulse SCM) enables organizations to assess their current level of security and fundamentally simplifies implementation and management of compliance processes according to specific security and privacy requirements.

The tool is a viable and efficient solution for IT Security and Privacy Officers, System Administrators, CEOs and CIOs.

Infopulse Standards Compliance Manager covers the entire information security management system (ISMS) of a company – from planning and implementing a security plan to certification.

STANDARDS

With governance, compliance and risk management all in one system, Infopulse SCM is a modular tool designed to manage your own and all official standards, specific policies and procedures.

- BSI Standard 200 (100)
